

# CURRICULUM VITAE

---

## PERSONAL DETAILS

Name: Arvo Paukkunen  
Age: 53  
Nationality: Finnish  
Address: Pajalahdentie 17 c 46, FIN-00200 Helsinki, Finland  
Telephone: +358 45 8854888  
E-mail: arvosoftware@hotmail.com

## Summary

Over 20 years' experience in software development and databases. Cloud based integrations and DW databases as a specialty area. In last 5 years and more, I have been using more and more cloud based technology like microservices, containers and REST, JSON, Nodejs etc... Senior team leader and architect roles to coordinate and lead as well as consultant in complex lighthouse and multivendor projects. Delivering projects all over the world – mostly in Europe and particularly in Finland of course. That gives me skills for delivery methodology and managing it. My contribution will be lead architect and / or team leader as well as implementation. I'm very passionate for it, and happy when I have an opportunity to develop, implement and design MDS/DW/SOA/REST/JSON/Cloud based integration projects as well as using several programming languages like c#, Typescript & java, visual basic & php with or without ASP.NET (and core). With my skill set, I have been delivering large scale 'lighthouse' projects with multivendor projects and as a subcontractor. My passion may be more in delivery and development, but a pre-sales is still definitely one of the key areas for me.

## Specialties

DB designs in all database brands and types (including multidimensional OLAP DB's). I'm expert in DB tuning and masterdata, especially with SQL Server and Oracle. ETL tools and modeling is naturally very familiar to me. SOA with REST and NodeJs .Cloud services and business process driven solutions are in my repertoire also. Currently more and more .NET

and modern mobile development, mainly c# and responsive sites with mobile device integrations. Most fun is develop frontends with Xamarin forms.

About the tools used, I must point out the Visual Studio (VSTS) as a really solid foundation on managing and developing all kind of projects on any servers and sandboxes. It helps to design all kind of architecture choices from on premises to hybrid and all in the cloud solutions. My favorite desktop is small Windows 10 tablet and remote desktop connection to my dev farm of SQL, SharePoint and Visual studio. The farm is on-premises servers and azure vm:s

## About me

In personal life, I'm sailing with classic yachts with HSS. Spending time on sea and on year around capable 'summer' cottage in Finnish forest near Savonlinna

## WORK EXPERIENCE

Experience of it-branch:	<b>+ 25 years</b>
Experience of current role:	<b>+ 2 year</b>
Arvosoft:	+ 4 year
Previously at Microsoft	+ 3 year

### *Service Line, Microsoft Consulting Services*

All BI stack, master data, SQL Server and SOA

2016 -	Bilot Oy	Current
2011 - 2015	Arvosoft	Principal Consultant
2008 - 2011	Microsoft Oy	Lead Architect & Senior Consultant
2004 - 2008	Software AG Nordic Oy	Consultant
2002 - 2004	Affecto Oyj	Consultant
Arvosoft	Freelance Consultant	
Before 2000	all the way to the 80's	
Computer Associates	Presales & Services Consulting	
ID Application Oy	Consultant & Consulting manager (Lead Programmer)	
Basware Oy	System Specialist (Programmer)
